

When choosing a JDA solution implementation partner, it is important to choose an organization that will partner with you over the long haul to achieve your supply chain goals. This partner must possess the expertise to convert your business objectives into a software implementation to achieve those objectives. Furthermore, this partner must have the industry expertise to leverage this technology as a competitive advantage.

Over the past decade, Spinnaker has become a leading, full-service JDA implementation provider. Our qualified staff of JDA implementation professionals has the know-how to help you leverage your JDA investment to increase operational efficiency, reduce costs, increase supply chain visibility and maximize the return on your JDA investment dollars.

HIGHLIGHTS:

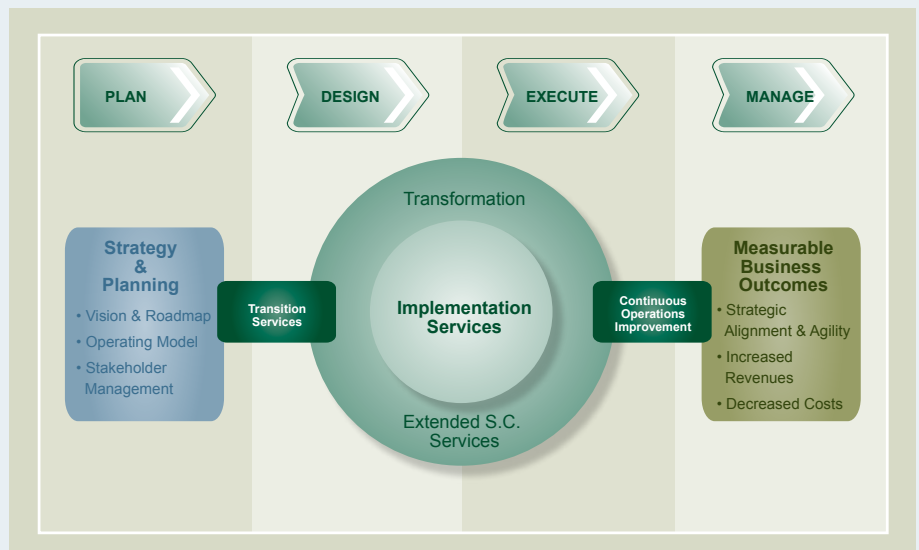

- Robust JDA implementation services including strategy, functional and technical solutions
- Deep expertise supporting Manugistics and i2 supply chain applications
- Focused solutions for the Consumer Goods, Retail, High Tech, Pharmaceutical and Telecommunications industries
- Spinnaker consultants have supported over 100 JDA implementations
- Proven, reliable implementation framework delivers real results
- Spinnaker clients will achieve more than \$300 million in margin improvements this year alone using Spinnaker’s JDA implementation services

Delivering Value Beyond Plug and Play

In today’s competitive business landscape not all companies and their respective supply chains are created equal – so why should the implementation of your JDA solution be treated in the same manner? Now more than ever your company demands an implementation solution that recognizes the complexities of your industry and fits your unique business needs.

Spinnaker’s JDA implementation services are tailored to your specific corporate needs. We utilize proven industry recognized best practices as the basis of our implementation methodology. Our goal is to implement a solution that helps your company achieve operational efficiencies, increased margin and a competitive marked advantage. Our consultants possess the expertise and years of experience required to ensure achievement of your implementation goals; but in a manner that minimizes common implementation pitfalls and expedites payback.
